

# SoLID VMM testing

February 14th 2022

Alexandre Camsonne

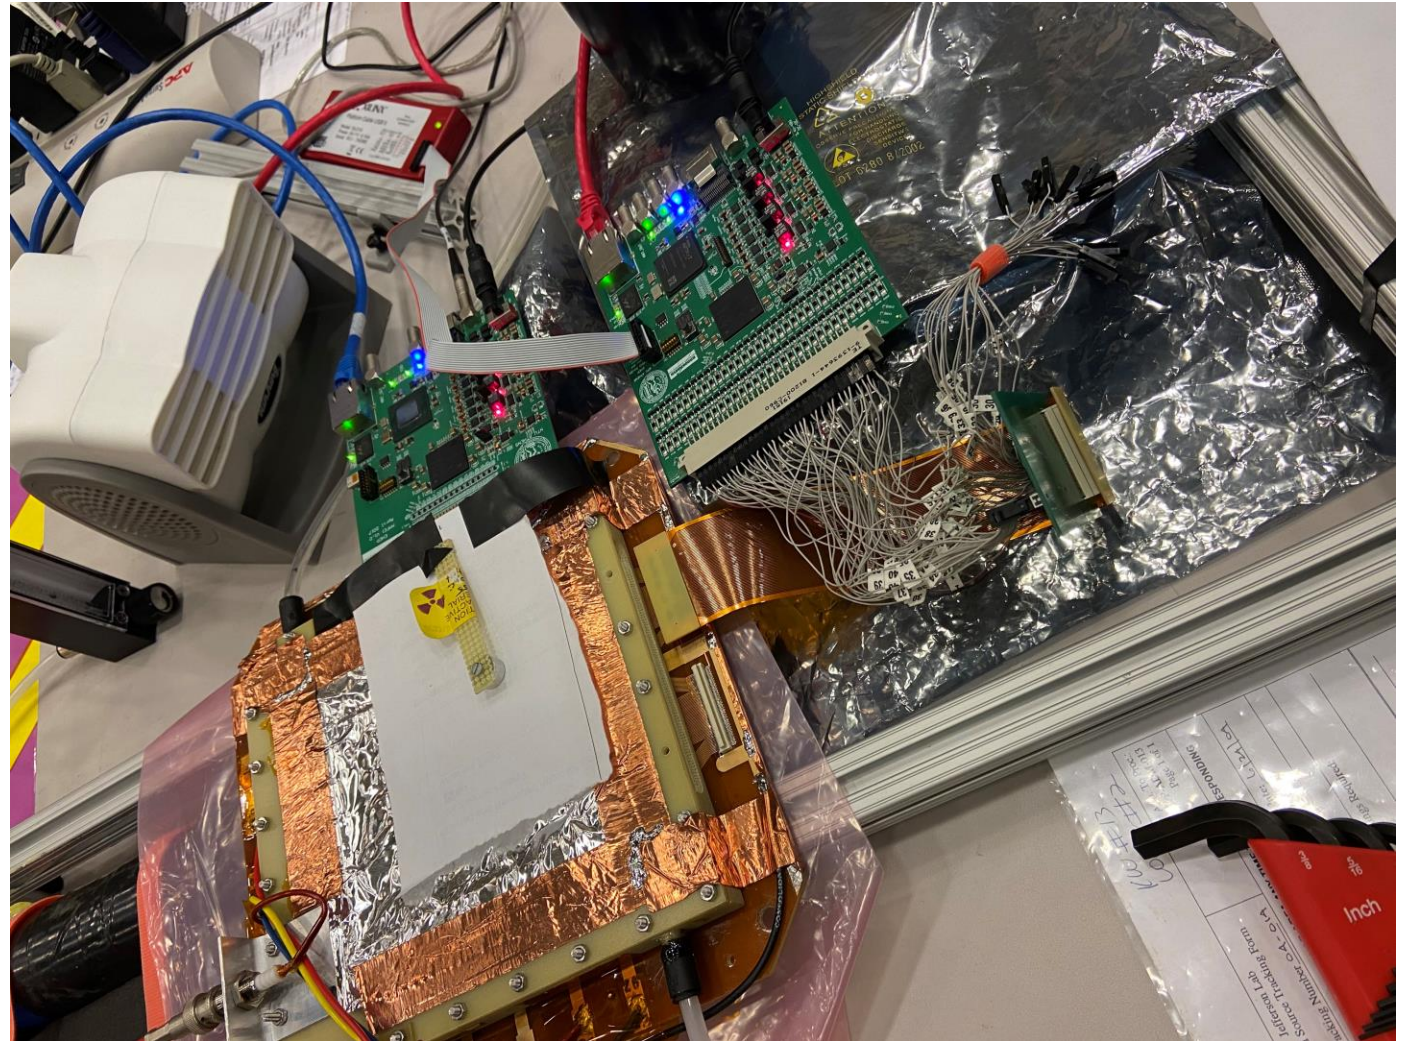

Xinzhan Bai

# VMM Fe55 Spectrum

# 6 bit mode testing

- Received adapter
- Noisy
- Checking grounding
- Plan for this week
  - add shielding
  - Take data different gains and shaping time
- Might

# VMM prototype status

- About 64 K\$ left
- Final quote this week : estimated need at least 22 K\$
- So far ordering 10 sets of new components from CERN ( about 4000 \$)
- Should be able to order 6 boards
- Keeping budget for second batch if needed
- If first batch can order
